

Four Important Reasons to Stop Using Paper Request Forms

1.

Reduce mistakes related to illegible writing.

Entering data electronically ensures information is correct.

2.

Eliminate extra steps and typos related to retyping data.

Hand written information does not have to be reentered into our system eliminating rekeying errors saving significant processing time.

3.

Remove confusion and frustration from the request process

The user is gently guided, step by step through the process. Access to RRS Medical customer service team reduces stress.

4.

Significantly increase turnaround time via electronic submission and secure e-delivery

Upon completion, the user hits the submit button to successfully complete their request.
